- Worked on product management system, implemented customer facing features using React and Typescript

Projects

Win 11 on Web

TYPESCRIPT, REACT, REDUX, NESTJS, AWS

- This is the project I enjoy doing the most and the one I am most proud of. I am still developing it, my goal is to make all the applications you see on the desktop work.
- Available on mertyildirir.com
- Other small personal projects are also available on the Win 11 desktop

Weather App

TYPESCRIPT, REACT, ZUSTAND

- This weather app displays the current weather in a desired city, including the current temperature, condition, humidity, and wind speed. By switching to the "Forecast" tab, it is possible to view a 3-day hourly forecast that is horizontally scrollable.
- Available as an application in Win 11 project

LOTR App

TYPESCRIPT, REACT, ZUSTAND

- This app displays information about the books, movies, characters, and quotes from The Lord of the Rings series in a tabular form. When you open the app, you will see a random quote. It is also possible to request a new quote.
- Available as an application in Win 11 project
